Global Partner Society (GPS) Program

The ARRS established its GPS Program to build long-standing relationships with key leaders and societies in the global imaging community to enhance understanding, raise awareness, and increase participation in programs and services. Elements of the program are itemized below, however, to meet the unique needs of each partner society, these benefits and responsibilities may be customized by mutual agreement. Once the GPS agreement is signed, the partnership and related benefits and responsibilities, except for the Annual Meeting Global Exchange, will begin immediately. Determination of the exact year of Annual Meeting participation will be made approximately two years before the next available ARRS meeting. An annual review of current GPS participants is conducted to ensure partnership benefits are being offered and responsibilities are being met.

GPS Benefits
